<https://www.linkedin.com/in/renuka-ramani-beera-945a61295/>

Motivated and detail-oriented Computer Science student with a strong passion for software development, artificial intelligence, and natural language processing. Experienced in building real-world projects involving machine learning, cybersecurity, and data analytics. Eager to apply technical skills in a challenging environment while continuously learning and contributing to innovative solutions.

PROJECTS

- **Steganography-Based Secure Data Hiding**

- Developed a cyber security solution to hide sensitive information inside images using steganographic techniques, ensuring secure and covert data communication
- Implemented a secure technique to embed confidential data within images for covert communication.

- **Image Encryption System**

- Built an image encryption and decryption application to protect visual data from unauthorized access, improving data confidentiality and security.
- Developed a system to encrypt and decrypt images to prevent unauthorized visual data access.

- **Accent Detective (NLP Project)**

- Created an NLP and speech-processing based accent detection system using MFCC and HuBERT features, demonstrating AI-driven language and speech analysis.
- Built a speech-based accent classification model using machine learning and NLP techniques.

- **Power BI Data Analytics Project**

- Designed interactive dashboards using Power BI to analyze and visualize data, enabling clear insights, trend analysis, and data-driven decision making.
- Created dynamic Power BI dashboards to transform raw data into meaningful visual insights.

Education

Chaitanya School & Sri Chaitanya College

2020-2023

Kakinada Institute of Technology & Engineering College

2023-2027

- Bachelor of Technology , Computer Science (Cyber Security)
- GPA: 7.56

Skills

- Python
- Streamlit (for ML/NLP app deployment)
- HTML, CSS
- Javascript
- Problem-solving
- Creativity
- Time Management
- Good communication
